

Adding Serena Shade & Pico Remotes to the Lutron App

From the My Home screen, open the *settings* menu by tapping the top left icon.

Tap *Add Device* to add a Serena shade/Pico remote.

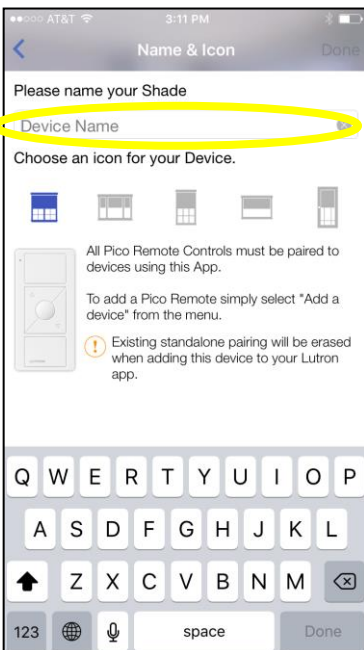

Select the type of shade or remote you are trying to add.

Follow the instructions to pair the shade with the app.

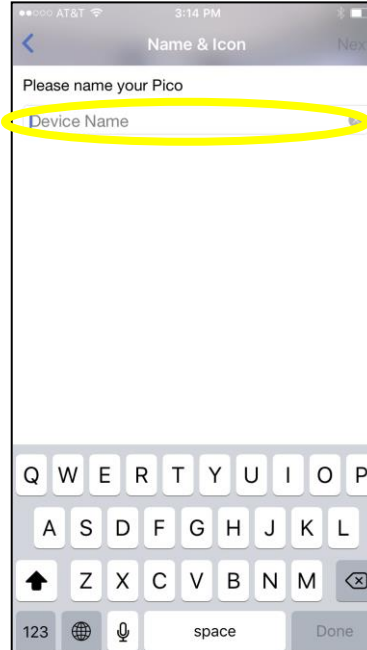

//

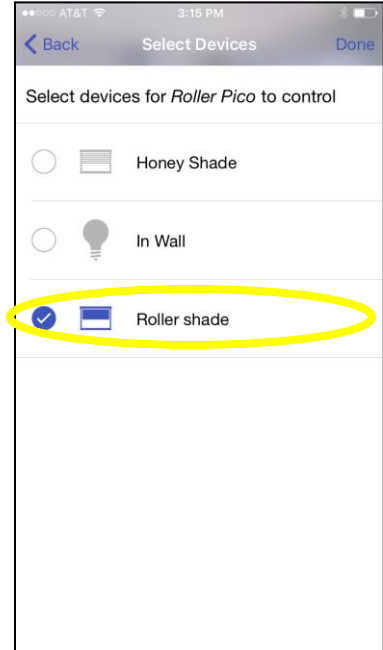

Name your shade/Pico remote. (ie. Living Room shade or Living Room Pico)

To pair a Pico remote, press and hold the *close* button when prompted

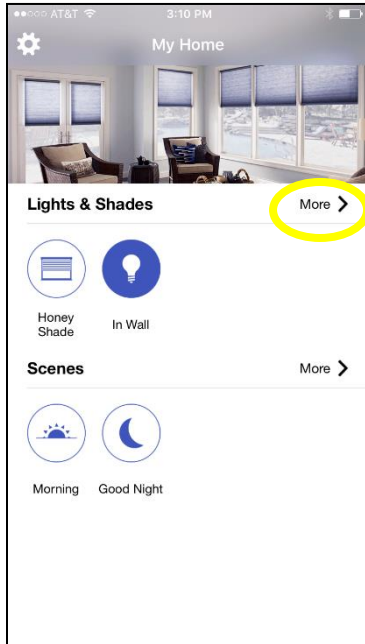

Name your Pico remote (ie. Bathroom Shade Pico)

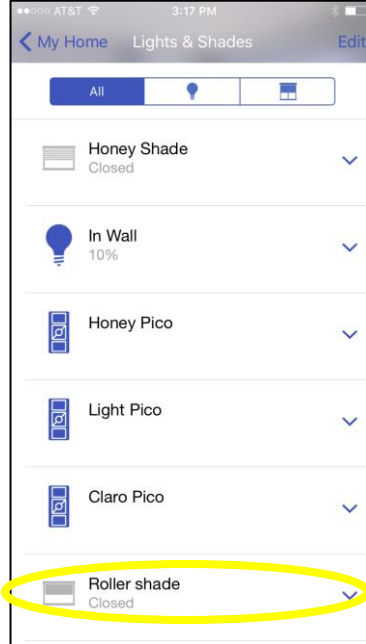

Select the device(s) you would like the Pico to control. Note: all shades paired to this Pico will move in unison

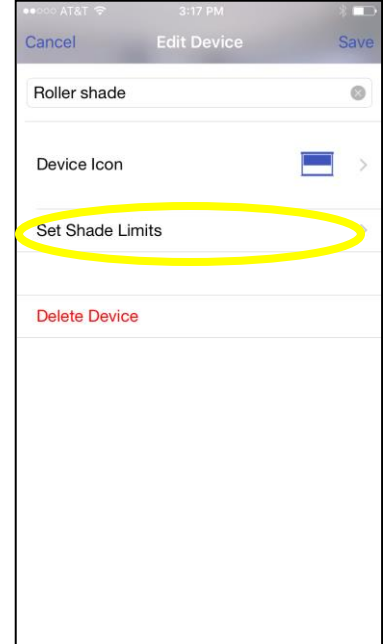

Adjusting Upper and Lower Limits and Creating Scenes

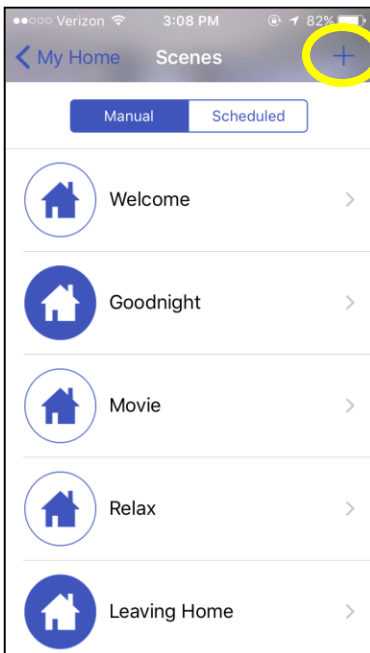

To set the limits (where *open* and *closed* positions are) tap *more* from the Home Screen under *Lights & Shades*)

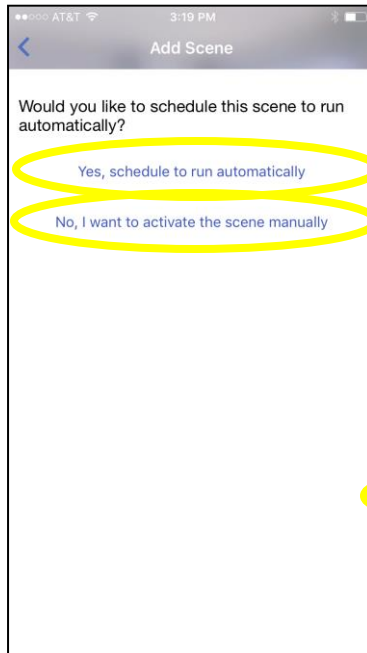

Select the shade you would like to adjust (note: limits can *only* be adjusted through the app once a shade is paired to the app)

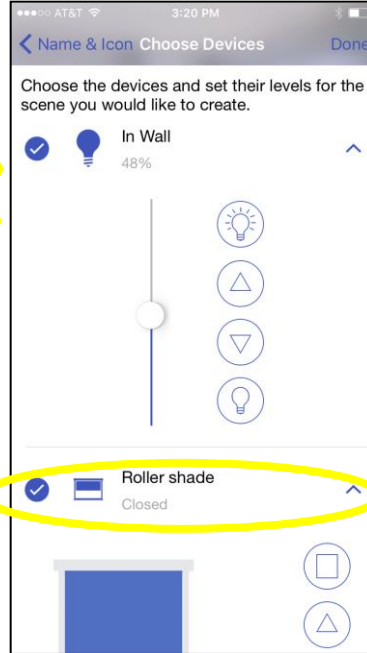

Tap *Set Shade Limits* and follow the instructions to determine where the highest and lowest positions should be

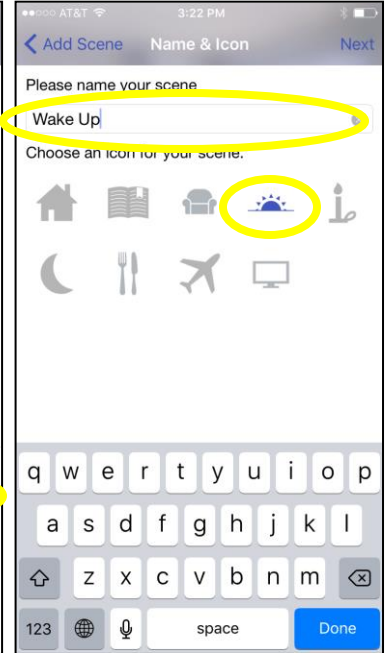

To create a scene (group of shades) press *more* from the Home Screen next to *Scenes* then press the + button

Select automatic or manual scenes. (Automatic scenes are triggered to run at a specified time)

Select the shades to be included in the scene with positions (ex. Set all Kitchen shades set to open)

Name the scene and select an appropriate icon. Activate scenes from the Home Screen of the Lutron App
